

Cyclone Options

PAGER SYSTEM

Be notified from up to 2,000ft. (600m) away from your Cyclone equipped bike when a theft attempt occurs. Pager responds when the full siren goes off. FCC & CE approved, 0.4W output.

Part No.: 42042

SECONDARY SIREN

Mounted externally on the bike, this 120dB waterproof siren adds extra volume to ward off thieves. Internal battery keeps the siren alive even if power is cut. Includes wired remote.

Part No.: 45619

SPARE TRANSMITTER

TX-23: Black Transmitter

REPLACEMENT CASES

TX-23SB: Black Case
 TX-23C: Carbon Fiber Case
 TX-23SW: Wood Grain Case
 TX-23SL: Blue Metallic Case
 TX-23SF: Hawaiian Case

FASTER INSTALLS

Quick-Connect installation harnesses are available for many bikes, making Cyclone even easier to install than with the included Universal Harness. Visit the KIRAMEK website for a complete list in PDF format.

CYCLONE™ 866F

TECHNICAL SPECIFICATIONS

ALARM UNIT

Operating Voltage	12Vdc (10.5v min.; 15v max.)
Current Consumption	Armed=4mA; Disarmed=3mA; Full Siren Blast=270mA; Sleep=1mA
Int. Batt. Charge Time	3 hours, continuous charging
Int. Batt. Alarm Time	2 hours (batt. used only when 12v line cut)
Int. Immobilizer Relay	30A max.; 25A@14vdc for 10min.
LED Flashing (Armed)	1 flash every 2 sec. (LED off in SLEEP)
Operating Temp.	-20°C to +60°C (backup batt. spec.)
Siren Blast Volume	120dB @ 30cm/1ft. (105dB by batt.)
Siren Chirp Volume	110dB @ 30cm/1ft. ("Quiet Chirp")
Dimensions	58 x 83 x 28 mm / 2.3 x 3.3 x 1.1 in.

STATUS LED

Housing	Waterproof
Light Color	Blue
Life	100,000 hours (>11 years)

TRANSMITTER

RF Output	303.825MHz or 433.92MHz
Batteries	Two CR1616, 3v lithium cells
Usable Range	15m/50ft.
Battery Life	1 year @ 6 presses per day
Housing	Waterproof
Wireless Security	66-bit Rolling Code

CYCLONE™
MOTORCYCLE SECURITY

*You supply the bike.
We'll supply protection.*

Ultra-Compact Design

CYCLONE was engineered in Japan to be the smallest full-featured motorcycle security system in the world. Not much larger than a pack of cigarettes, Cyclone fits most any bike.

Advanced Shock & Tilt Sensing

Digital 2-axis tilt sensor and 2-stage shock sensor immediately trigger the siren during theft attempts. Separate adjustments for 1st & 2nd shock stages. Digital and analog filtering prevents false alarms.

Onboard Battery Backup

Internal Ni-MH battery keeps Cyclone running when the main power is cut, and siren is immediately triggered. Backup battery has the capacity to drive the full siren blast for over 2 hours.

Starter Immobilizer

Built-in 25A relay can be used to prevent starting by severing the starter line, fuel line or magneto coil while armed.

Auto Arm

Automatically arms 5 min. after ignition is turned off.

Silent Mode

Kills full siren blast but allows Warning & Confirmation chirps.

Sleep Mode

Shuts off most functions to conserve bike's battery power. Also acts as a Valet mode.

Panic Siren

Easily activated with transmitter to alert others in an emergency.

Powerful Siren

Ear-piercing 120dB siren warns of theft attempts. User programmable siren duration of 10 or 30 sec. 110dB Quiet Chirp.

Siren Trigger Memory

When disarmed, system informs you with chirps and flashes if siren went off in your absence.

Sector Bypass System

SBS prevents the siren from becoming a nuisance. Shock, tilt and ignition triggers are individually bypassed if they trigger 5 times. Feature can be disabled.

Manual Disarm

Allows you to disarm without a transmitter, simply by turning the ignition key the same number of times as your secret code.

Advanced Security = Peace of Mind
